Defaults for Windows NT

This subsection covers the following topics:

- Invoking the Defaults for Windows NT Screen
- Field Descriptions: Defaults for Windows NT

Invoking the Defaults for Windows NT Screen

If you select Windows NT from the window, the following screen appears:

```
 21.11.01               *** Entire Operations ***              08:48:52
 Owner EXAMPLE                Defaults for Windows NT
-------------------------------------------------------------------------------
End-of-Job Checking
   Highest Exit Code accepted as ok   ==> 0_____

 Escapes: Activation ==> §  Submission ==> ^

 

 Note: Modifications become effective at the next monitor startup.

 Command => _____
Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---
      Help        End        Save                                  Menu
```

Field Descriptions: Defaults for Windows NT

Field	Meaning	
End-of-Job Checking		
Highest Exit Code accepted as ok	The value entered here is the maximum exit code which is accepted as OK.	
Escapes:		
Activation	Activation escape character. This escape character is prefix for Natural code lines and symbols to be replaced at activation time.	
	Note:	Existing Dynamic JCL might become invalid after changing this escape character.
Submission	Submission escape character. This escape character is prefix for symbols to be replaced at submission time.	
	Note:	Existing Dynamic JCL might become invalid after changing this escape character.

These settings become effective after the next Monitor startup and are then used as defaults for new job definitions.
